Projects

Movie Review

This is a Netflix-inspired project where you can see ratings for newly released and upcoming movies, with links included to check out the trailers to the movies you're interested in. In this project you will find a categories directory, search functionality, and the ability to save your favorites as well as movies you have yet to see.

- **Technologies Used**: Frontend: React & Redux, Backend Django API.
- **GitHub link: https://github.com/tsema000/synamatic.git**
- **Website: https://demo-frontend-pro.herokuapp.com/**

Twitter Clone

With this project, we created a platform where you can express your thoughts anonymously, showcase your pictures, and much more on a single website. Post, edit, or delete posts at the convenience of just a few touches. This project is based on Twitter and anonymity adds to its special features. Without the necessity of an account, you can share your thoughts and memories with the world at any time.

- **Technologies Used**: HTML, CSS, Bootstrap, JavaScript/jQuery, Django, Cloudinary (to host uploaded images on CDN), Heroku.
- **GitHub link: https://github.com/tsema000/Twitter_Clone.git**
- **Website: https://twitterclone-sema.herokuapp.com/**

Dream House

Dream House is a Real Estate listings website where you can browse homes for sale and rent, as well as sending in your request to sell your home with Dream House. You can save homes to your favorites once you've signed up for an account, and you can log back in at any time to see your favorites.

- **Technologies Used**: Frontend: React & Redux, Backend Django API.
